2011 Customized Fee Analyzer

Developing a fair and reliable fee schedule requires an understanding of fees charged in your area, for your specialty. Specific information for your geographic locality is necessary, as fees vary widely across the country. Relying on national averages can result in reimbursement that is too low and billable charges too high. *Customized Fee Analyzer* provides a customized report with relative and actual charge data—completely updated for 2011—for your specialty and zip code.

One Specialty	(Item# 1790)	\$299.95
Two Specialties	(Item# 1791)	\$399.95

2011 The Essential RBRVS

The Essential RBRVS RBRVS is a complete relative value schedule based on Medicare's RBRVS. CMS develops the RBRVS for the *Medicare Physician Fee Schedule*. The *Medicare Physician Fee Schedule*, however, is not a complete schedule. Medicare does not pay for some services and does not assign relative values for other services. Codes in the RBRVS not provided a RVU for Medicare are often referred to as "gap" codes. *The Essential RBRVS* provides all codes valued by CMS, as well as the codes not valued for Medicare. The valuation of "gap" codes provides a logical way to value services performed using one relative value scale.
